

ACCOUNTING AND ECONOMICS SOCIETY

FOURTH ANNUAL CONGRESS 2027

CALL FOR PAPERS

June 4–5, 2027 · The Wharton School
University of Pennsylvania · Philadelphia, Pennsylvania

Call for Papers

The **Fourth Annual Congress of the Accounting and Economics Society** invites analytical, empirical and experimental research at the intersection of accounting and economics.

Topics include economic institutions, information and market mechanisms, and interdisciplinary work across the social sciences. The Congress joins the Accounting Theory Summer School and Junior Accounting Theory Conference at Wharton.

[Submit a Congress paper](https://form.jotform.com/262924361983062)
form.jotform.com/262924361983062

One PDF, maximum **5 MB (5120 KB)**, plus paper metadata. Congress and JATC have separate forms. Larger file? Select the emailed-paper option, then email acceconsociety@gmail.com; subject: **AES 2027 Congress submission — [paper title]**. Both metadata and uploaded or emailed PDF are due by the deadline.

June 6, 2027	Junior Accounting Theory Conference

Attendance: US \$200. [AES membership](#) is required to attend, not to submit. Dues separate. Registration is not yet open; registration/payment later through Wharton. Decision dates forthcoming.

Keynote Speakers

Robert A. Miller

Tepper School of Business
Carnegie Mellon University

Miller develops structural econometric methods for dynamic choices and strategic interaction. With coauthors, he introduced conditional choice probability estimators

that make dynamic discrete choice models computationally tractable. His empirical work spans job matching, labor markets, housing, executive compensation, financial markets and auctions. He holds the Richard M. Cyert and Morris DeGroot Professorship in Economics and Statistics and is a Fellow of the Econometric Society and the International Association of Applied Econometrics.

Phillip Stocken

Jack Byrne Professor of Accounting
Tuck School of Business, Dartmouth College

Stocken studies accounting and auditing theory, financial reporting and credible communication. His research examines voluntary disclosure, management

forecasts, analyst information acquisition and the strategic effects of accounting measurement. His monograph *Strategic Accounting Disclosure* analyzes disclosure in non-contractual settings. His publications include work in *The Accounting Review*, *American Economic Review* and *Journal of Accounting Research*. At Tuck, he teaches accounting and financial analysis to MBA and executive audiences.
